

“The mobile market is no longer just communication: It's Internet, music, video, Web, social networks, navigation, and everything else... The mobile ecosystem now embraces anything a consumer wishes to do either on the move or on a handheld device at home- Forrester”

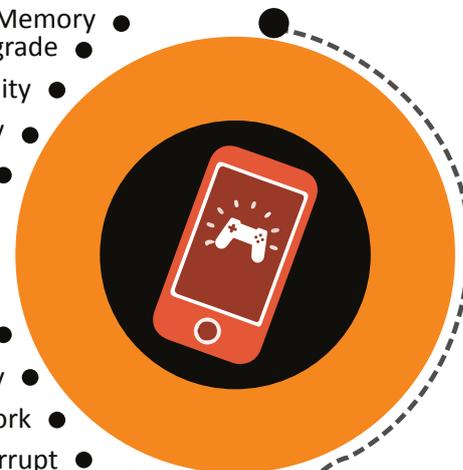

Over the last decade, there has been a lot of transformation in philosophy of testing as several tools have been introduced in the market place. With so many choices around, it has become a real challenge to choose the right testing partner / service provider. Testing industry has witnessed a phenomenal growth in term of offerings, tools, and infrastructure with diverse engagement models. Now, it has become a lot more important for organizations to choose the right testing partner.

Cigniti delivers Independent Quality Assurance Services backed by its proprietary IP. As a strategic partner, Cigniti brings comprehensive service offerings in the quality assurance space which accelerate overall test efforts for its clients.

Cigniti Mobile Applications Testing Services

- Memory

- Technology partnerships

Is your mobile app Cigniti Tested?

Cigniti’s test teams have build roadmaps for mobile application testing to help clients turn mobile application ideas into success stories, and ensured quicker ROI.

Cigniti’s promise of “Optimal test coverage for all scenarios” is only the beginning.

The expert packed mobile application test teams design test strategies that ensure rapid deployment, scalable test scopes and reusable components.

Cigniti's Mobile Testing Center of Excellence is built on a strong foundation of People, Processes, Tools, Devices and Frameworks. The center caters to our clients for quicker time to market and ROI.

Cigniti jump-starts your mobile automation efforts with a test automation framework for mobile that is both device and testing tool agnostic.

Cigniti's mobile device Cloud has helped enterprise organizations realize significant effort and cost savings in mobile application testing with 'On-demand' global access.!

Functional Testing – Focus on your core business – leave the testing to us. Functional testing with detailed metrics and defect trend analysis to eliminate those "Gotchas" in Production!

Security – New technology brings new worries; let security be the least of those for your mobile application. New age vulnerability assessment to ensure compliance with industry standards

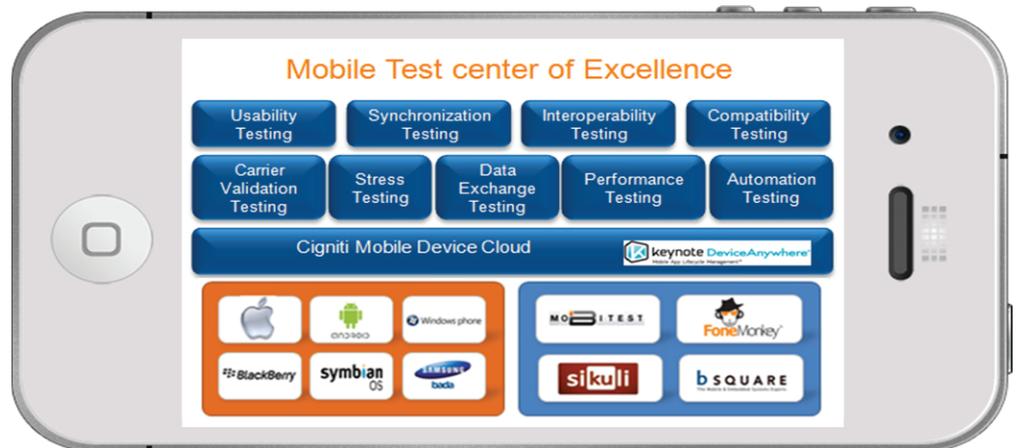

Install / Upgrade / Data Exchange – Be assured that your end users have a hassle-free install / upgrade or sync across supported OS versions

Hardware – Extensive testing from a hardware perspective for hardware buttons, battery, screen, touch and much more!

Device input – No Keyboard? No problem! Make your touch keyboard count! Testing for capacitive touch and external 3rd party devices is only a start!

I18n and L10n – Going Global with your app? You worry about the marketing, while we ensure true globalization for your application!

Network – Need to know how the app does in the field?

No Problem! Cloud enabled mobile test lab with access to live carrier networks, Bluetooth, Wi-Fi and NFC!

Device & OS – Cross platform support for apps? Application testing on varied Device / OS combinations!

Cigniti Mobile Device Cloud

Cigniti's device cloud offers an array of mobile devices to choose from. Be assured of testing on actual devices, and diverse device platform / OS combinations on live carrier networks or Wi-Fi.

True "On-Demand" Global access, test automation accelerators, proven methodologies and device agnostic frameworks! This is only the beginning!

Ensure Mobile applications that add convergence to your enterprise and turn it into a well-connected business organization

Deploy your next mobile application with confidence not just gut feel. Cigniti mobile testing experts have found innovative ways to build tests for maximum coverage across device / OS combinations, Browser / OS combinations and much more!

Leverage Cigniti's Mobile TCoE and be assured of your Mobile Software Quality!

Beat the queue by launching enterprise grade mobile applications by leveraging Cigniti's Mobile TCoE

" By 2013 mobile phones will overtake PCs as the most common Web access device worldwide and that by 2015 over 80 percent of the handsets sold in mature markets will be smart phones "- Gartner
